

# Dashboard and Story Screenshots

Strategic Product Placement Analysis

## Final Tableau Dashboard

The dashboard combines category sales, consumer demographics, seasonal sales, competitor pricing, foot traffic, and product pricing in one analytical view. Interactive filters support focused retail analysis.

Figure 1. Final Tableau Dashboard

## Story View 1 — Product Category Performance

This story view compares average sales volume across Clothing, Electronics, and Food. Clothing shows the highest average sales volume, followed by Electronics and Food.

### PRODUCT PLACEMENT ANALYSIS - STORY

**Figure 2.** Story View 1 — Product Category Performance

## Story View 2 — Foot Traffic and Product Position

This packed-bubble view compares High, Medium, and Low foot-traffic levels across Aisle, End-cap, and Front of Store positions to evaluate placement performance.

### PRODUCT PLACEMENT ANALYSIS - STORY

**Figure 3.** Story View 2 — Foot Traffic and Product Position

# Story View 3 — Product Placement Distribution

The treemap presents sales volume across product categories and placement positions. Larger areas highlight stronger product-placement combinations.

**Figure 4.** Story View 3 — Product Placement Distribution

# Project Visualization Summary

The completed Tableau solution transforms retail product placement data into clear and interactive visual insights. The dashboard provides a consolidated analytical view, while the story communicates important findings in a guided sequence.

**Dashboard** — Consolidated retail performance analysis

**Story View 1** — Product category sales comparison

**Story View 2** — Foot traffic and product placement analysis

**Story View 3** — Sales distribution by category and product position

## Conclusion

The visualizations help identify category performance, customer segments, traffic patterns, pricing differences, and effective product positions. These insights support data-driven retail placement decisions.
