

PROJECT PLANNING TEMPLATE

Strategic Product Placement Analysis

Project Objective

To develop an interactive retail analytics solution that analyzes product placement and sales-related factors using Tableau and presents the dashboard and analytical story through a Flask and Bootstrap web application. The project aims to simplify retail data interpretation and support clearer product placement insights.

Project Scope

The project covers retail dataset review, business question identification, Tableau visualization development, dashboard creation, Tableau Story development, publishing to Tableau Public, Flask web integration, interface customization, testing, documentation, and final project presentation.

Phase	Planned Activities	Deliverable
Ideation	Define the retail problem, understand user needs, and brainstorm possible analysis ideas.	Problem statement, empathy map, and brainstorming documents.
Requirement Analysis	Identify functional, data, visualization, web, and system requirements.	Customer journey map, solution requirements, data flow diagram, and technology stack.
Project Design	Map problems to solutions and define the final solution and architecture.	Problem–solution fit, proposed solution, and solution architecture.
Data and Analytics Development	Review the dataset, define business questions, and build Tableau charts.	Prepared analysis and business-question visualizations.
Dashboard Development	Combine visualizations, add filters, format layout, and test interactions.	Interactive Tableau dashboard.
Story Development	Select important findings and organize them into story scenes.	Interactive Tableau analytical story.
Web Development	Build the Flask application and customize the Bootstrap interface.	Flask web application with project sections.
Integration	Embed published Tableau dashboard and story in the Flask website.	Integrated analytics web interface.
Testing	Verify navigation, filters, story movement, layout, and embedded views.	Tested project with identified issues corrected.
Documentation and Submission	Prepare project documents, screenshots, report, repository, and demo material.	Final documentation and submission-ready project.

PROJECT MILESTONES

Planned Work Sequence and Completion Targets

Milestone	Main Task	Completion Indicator
M1	Problem definition and ideation	Core retail analytics problem and solution direction are clearly defined.
M2	Requirement analysis	Project requirements, data flow, and technology choices are documented.
M3	Solution design	Problem–solution fit, proposed solution, and architecture are finalized.
M4	Tableau chart development	Required business-question visualizations are completed.
M5	Dashboard completion	Dashboard layout, filters, titles, and interactions work correctly.
M6	Story completion	All story scenes are created and navigation works correctly.
M7	Flask website completion	Project interface and navigation sections are customized.
M8	Tableau integration	Dashboard and story are embedded and remain interactive.
M9	Testing and correction	Layout, filters, story scenes, and website navigation are verified.
M10	Documentation and repository	Project documents and source files are organized for final submission.

Tools and Resources

Tool / Resource	Planned Use
Tableau Public	Retail data analysis, dashboard creation, story development, and publishing.
Python and Flask	Web application runtime and template rendering.
HTML, CSS, Bootstrap, JavaScript	Web interface structure, styling, responsiveness, and interaction.
VS Code	Project development, file organization, editing, and terminal execution.
GitHub	Repository organization and final project source management.

Project Planning Outcome

The project plan divides Strategic Product Placement Analysis into clear phases and measurable milestones. The sequence moves from problem understanding and requirements to Tableau development, Flask integration, testing, and documentation. This structured plan supports consistent project development and ensures that the final dashboard, story, web interface, and project documents are completed in an organized manner.
