

DATA FLOW DIAGRAM

Strategic Product Placement Analysis

Purpose

The data flow diagram explains how retail data moves through the project from the source dataset to Tableau analysis, interactive visualizations, Flask web integration, and the final user insights. The flow is designed to keep the analysis simple, structured, and easy to understand.

DATA FLOW DETAILS

Processes, Inputs, and Outputs

Process	Input	Output
Data Collection	Retail product placement dataset	Raw retail data for analysis
Data Preparation	Raw dataset and field values	Reviewed and analysis-ready data
Tableau Analysis	Prepared retail data	Calculated comparisons and visual measures
Dashboard Creation	Charts, filters, and business questions	Interactive product placement dashboard
Story Creation	Selected visual findings	Structured analytical story
Web Integration	Published Tableau views and Flask template	Interactive analytics website
User Exploration	Dashboard filters and story navigation	Retail sales and placement insights

Data Flow Outcome

Retail data flows through preparation and Tableau analysis before being transformed into an interactive dashboard and story. The published visualizations are embedded in the Flask web application, where users can explore filters and interpret product placement insights. This flow connects the dataset, analytics, visualization, web integration, and final decision-support experience.
